# CASHVISION

The CASHVISION is a self-service cash payments machine, especially conceived for high-volume, cash-intensive retail scenarios. It represents an incredible way to improve the overall efficiency of cash payments, eliminating human error from the equation, and assuring the very best protection of the collected payment assets.

It uses a very simple operating principle: each time a payment is processed, the customer uses the CASHVISION to insert cash until the total amount for the purchase is reached. As the machine is connected to the POS system, it receives and counts the cash, processes the payment and, thanks to its cash recycling capabilities, always returns the correct amount of change. Its security features protect the assets, reducing the risk of theft and fraud.

## Features

- 7" Touchscreen Display
- Accepts bank note and coin payments
- Secure cash recycling
- High-speed counting and validation
- High security locking system
- Electrostatic painted, highly resistant to corrosion and with low conductivity
- Wide-range and flexible integration capabilities
- Ethernet, RS232 & GSM communication
- Maintenance & Monitoring Software

## Main Benefits

- Highly reduced risk of theft and fraud
- Improved efficiencies handling cash at the end of day
- Eliminates human error when counting money and giving change
- Automatic validation of denominations and rejection of counterfeit money
- Removes the need for tellers to handle money directly
- Safely stores money

### Dimensions

Length	Width	Height
332mm	354mm	506mm

Use our powerful and flexible HEROCASH platform to monitor and maintain any size of kiosk or service machine network, at any time and from anywhere. With it you will get:

- Real-time modular & overall status
- Real-time capacity monitoring
- Remote maintenance & updating
- Sales & operational reports
- Alert & notification system
- Real-time ROI measurement

## Specifications

### CASH HANDLING TECHNICAL SPECIFICATIONS

### Bank Notes

Acceptance Type	Single note
