

# CASHVISION PLUS

**NEWVISION®**

## CASHVISION PLUS

The CASHVISION PLUS is a cash management machine, especially conceived for high-volume, cash-intensive retail scenarios. It represents an incredible way to improve the overall efficiency of staffed cash payments, eliminating human error from the equation and assuring the very best protection of the collected payment assets.

It uses a very simple working principle: whenever a payment is to be processed, the teller uses the machine to insert the customer's cash until it reaches the total amount of the purchase. Since the machine is connected to a POS system, the machine will take and count the money, process the payment and thanks to its cash recycling capabilities, it always gives back the correct amount of change. Its security features protect the assets, reducing the risk of theft and fraud.

### Features

- 7" Touchscreen Display (movable)
- Accepts coin and bank note payments
- Safe-protected cash recycling
- High-speed counting and validation
- Electrostatic painted, highly resistant to corrosion and with low conductivity
- Wide-range and flexible integration capabilities
- Ethernet, RS232 & GSM communication
- Maintenance & Monitoring Software

## Main Benefits

- Highly reduced risk of theft and fraud
- Improved efficiencies handling cash at the end of day
- Eliminates human error when counting money and giving change
- Automatic validation of denominations and rejection of counterfeit money
- Balances cash-availability between all tellers
- Safely stores money

### Dimensions

Length	Width	Height
505mm	641mm	735mm

Use our powerful and flexible HEROCASH platform to monitor and maintain any size of kiosk or service machine network, at any time and from anywhere. With it you will get:

- Real-time modular & overall status
- Real-time capacity monitoring
- Remote maintenance & updating
- Sales & operational reports
- Alert & notification system
- Real-time ROI measurement

## Specifications

### CASH HANDLING TECHNICAL SPECIFICATIONS

### Bank Notes

Acceptance Type	Bulk
Acceptance Speed	< 1.5 seconds per note
